

○ SimploudGo - Ready-to-use offering    ● SimploudPro - Flexible, purpose-built offering

### Evaluation planning

Short call/demo to understand what are your needs and set you up for a successful evaluation of Simploud.

### Free Trial

**SimploudGo**  
You start work in the pre-configured and pre-validated Simploud Go environment. By the end of the free trial you can decide whether it fits your need.

**SimploudPro**  
You can begin working with Simploud designing it to meet your needs so by the end of the test drive you'll be able to see it in action with your design in place.

### Convert

Now that you've tested Simploud you can determine if it meets your needs (94% that this will be the case). We sign a contract and move forward with the setup of your environment.

### Verify direction

After the free trial we discuss with you which direction is the best to follow for you: Simploud Go or Pro.

### Finalize design

**SimploudGo**  
Slight changes are possible to make in the design/layout without impacting the validated state.

**SimploudPro**  
Pickup the work from where you ended your free trial.

### Validate

**SimploudGo**  
Sign-off the validation documents. No extra work is needed for the validation.

**SimploudPro**  
Validate your design directly in the system, using automated validation scripts which are reducing the time spent on validation enormously.

### Train

You're all set, now all is left is to train your users and launch.

### Import data

**SimploudGo**  
The Go package also allows to import historical data/documents (if you have them), or you can use the processes and templates incorporated to the package.

**SimploudPro**  
If you already have documents or/and records you would like to import, we can simply import them.

### Go-live!

You're officially live, time to improve and launch more applications, never stop innovating.

### Switch from Go to Pro any time

As your company grows, your needs will also change. Once you have the time/resource/experience, you can change the configuration of your processes any time - with our support - and switch to the Simploud Pro route.

Ongoing process of continuous improvement
