

# Simploud Compliance Made Simple

## Who We Are

Simploud is a modern, cloud-native compliance platform designed specifically for life sciences, biotechnology, pharmaceuticals, medical devices, and laboratory-based companies. We empower organizations to confidently manage highly regulated processes by providing a flexible and intuitive system that adapts to their unique needs. With Simploud, companies can streamline quality management, document control, training, laboratory information, and design processes in one centralized solution.

Our mission is to eliminate complexity, reduce compliance risks, and ensure continuous audit readiness—allowing teams to focus more on innovation and growth, and less on administrative burden.

## What We Offer

### Laboratory Management

Our cloud-native LIMS supports laboratories in managing samples, workflows, instruments, and results with complete traceability.

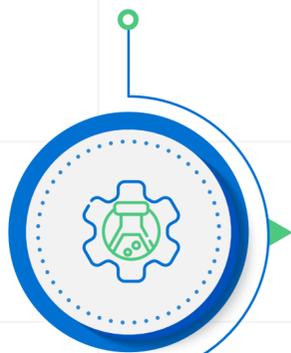

### Design & Compliance

Built-in support for design control and regulatory requirements with full traceability from risk management to verification.

### Quality Management

Simploud provides a comprehensive QMS that helps organizations streamline audits, CAPAs, deviations, complaints, and change controls.

### Document & Training

Create, review, approve, and track controlled documents while managing employee training records and certifications.

### Flexible Platform

A flexible, modular system that adapts to your business processes and grows with your organization.

## Our Value Proposition

- ✓ **Tailored yet Fast Deployment** – Fully configurable compliance platform that adapts to your workflows, with the speed of a pre-configured system.
- ✓ **All-in-One Compliance Ecosystem** – Manage QMS, LIMS, Design Control, documents, training, audits, and risks in one unified platform.
- ✓ **Cost Predictability + No Hidden Fees** – Fixed subscription pricing with no hidden fees—includes support, validation, updates, and training.
- ✓ **Immediate Value & Audit Readiness** – Rapid deployment with built-in validation so you're always prepared for inspections and audits.
